

Case Study: St Clere's School

**MONEY
MECHANICS**

Money Smart is a financial education programme aimed at 11-25 year olds who are Deaf or sight impaired. It aims to build financial capability and improve access to services, focusing on public and personal finance.

Topics include everything from budgeting and banking to fraud and spending.

Tilly, 13

"I think it definitely helps with my independence. To know how to get around problems.

I've learnt how to manage my money and know there's options out there if I need them like different types of formatted banking paperwork. Stuff about taxes and the difference between credit and debt were difficult but now I understand them.

I really like working in groups so this was great as was using tactile diagrams and interactive worksheets. I also get pocket money - from this I now know how to save and manage money and not go overboard."

Created by MyBnk and the Royal Association for Deaf people.
Supported by Players of People's Postcode Lottery.
